

SOLVED

ODOR & VOLATILES

Eliminate Odors and Reduce Volatiles

with STRUKTOL Innovative Additives – from high odor/volatile feed streams in recycled applications to strict odor/volatile specifications in automotive and packaging applications.

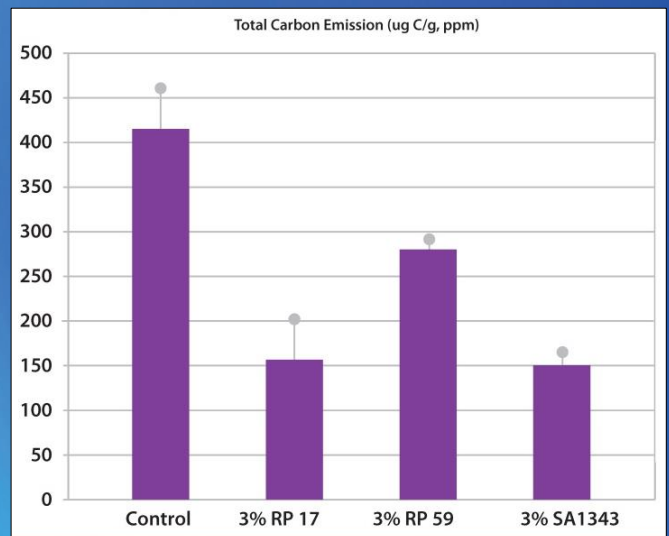

ODOR AND VOLATILE CONTROL PERFORMANCE

Automotive TPO interior sheet application tested using the Volkswagen test method PV3341:

	Control 1	2% RP 59	Control 2	2% RP59
Volatile Organic Compound (VOC)	1.33	0.99	1.43	0.87

→ Volatile reduction observed correlated to a lower odor panel rating for the parts made using STRUKTOL® RP 59.

struktol® = INNOVATION + TECHNOLOGY + PERFORMANCE
